

AeroDesk - Project Question Bank

215 Questions & Answers - Viva / Interview Preparation

Project: AeroDesk - Passenger Flight Booking Through Agency

Cours

> This is an exhaustive list of every type of question that can be asked in a

> viva

SECTION 1 - Introduction & Overview

1. What is your project? -> A web-based Airline Reservation & Booking Management System where agencies book flights for passengers; admins manage data; the app demonstrates DBMS concepts.

2.

SECTION 2 - DBMS Theory (very commonly asked)

16. What is data? Information? -> Data = raw facts; Information = processed, meaningful data.

17.

SECTION 3 - Schema & Tables (your specific design)

61. How many tables are there? -> Six: passenger, agency, flight, booking, users, audit_logs.

SECTION 4 - SQL & the 30 Queries

76. What is SQL? -> Structured Query Language to manage relational data.

77.

SECTION 5 - Application Architecture (PHP/MySQL/JS)

111. What is the overall architecture? -> Front-end (HTML/CSS/JS) -> PHP JSON API (api.php) -> MySQL.

112.

SECTION 6 - Security & Roles

131. What security features are implemented? -> Hashed passwords, sessions, role-based access, server-side checks, audit logs, input escaping.

132.

SECTION 7 - Features & Functionality

149. What are the core features? -> Search & book, bookings, records CRUD, reports, exports, PDF tickets, SQL Lab, audit, users.

150.

SECTION 8 - UI / UX & Design

161. What design style is used? -> Glassmorphism (blur + transparency), gradients, soft shadows, rounded corners.

162.

SECTION 9 - Testing, Deployment, Troubleshooting

171. How do you run the project? -> Put folder in xampp/htdocs, start Apache+MySQL, open localhost/aerodesk/home.php.

172.

SECTION 10 - Tricky / Conceptual Follow-ups

185. Why a surrogate key bid instead of composite (pid,fid)? -> Easier to reference one booking (cancel/PDF) while UNIQUE(pid,fid) still prevents duplicates.

186.

SECTION 11 - Rapid-fire one-word/one-line

201. Language for server logic? -> PHP.

202.

*Exam tip: Be ready to (1) open the ER relationships, (2) run any of the 30 queries
